

# Quick Access Toolbar

When 3D geometry is selected in the 3D area, the Quick Access Toolbar will appear, with

will appear close to the selected

This options includes:

**Translate:** To show draggers needed to move the object

**Snap to Object:** To allow the user to snap the selected object to another.

**Copy:** To create a new copy of the selected geometry

**Value Input:** Allows the user to enter exact values for translation or rotation

**Material:** Opens Quick Material Access

---

**Move selection Up/Down:** It allows moving up or down in the Scene Browser based on selection, going up means selecting the parent, moving down means selecting a child, this makes it very easy to select and move through a specific part or assembly

**Quick Material Access:** It makes it easy to

change material finish to another type, for example you can set it to Plastic, Metal, or Glass

---

**Note:** From preferences the user can select to turn on/off appearance of Quick Access Toolbar

---
